ANNEXURE A

Vision Statement

***A globally renowned and reliable service provider in
flow technology***

Mission

1. Evaluation of flow products with world class, accurate, reliable advanced technology for end users and manufacturers complying with globally accepted standards and practices
2. Act as a solution provider to flow and related problems
3. Conduct research programs in order to develop technology / product/solutions
4. Act as a National standard for flow
5. Disseminating knowledge to working professionals and students in India and abroad
6. Expand the sphere of influence by venturing into new areas and services with proper strategies
7. Increasing the visibility of FCRI

KEY OBJECTIVES

a)Development of Fluid Control Systems

- To build up expertise and capabilities relating to measurement and control of flow of fluids.
- To standardise and unify fluid control and measuring elements and systems.
- To standardise and codify techniques of measurement of different types of fluids.
- To undertake the design, production, testing and evaluation of proto-types of fluid control elements and systems.
- To promote technical co-operation in the field of flow measurement and control with developing countries.

- To enter into arrangement with competent foreign agencies and institutions with the approval of the Government of India, for exchange of scientists, to organise study tours and undertaking joint projects, providing technical assistance in establishment of Research Institutions dealing with fluid control and fluid dynamics.
- To provide assistance and support to the flow products industry in the large, medium and small scale sectors in design, testing, evaluation and training.

b) Fluid Control Elements Research

- To conduct basic and applied research in the design of Fluid Control/conditioning equipment's and to optimise design and production cost.
- To do research in to the behaviour of above elements in the various process media under different operating conditions.
- To do research in hydraulic/electrical/electronic/pneumatic actuating systems used for above elements.
- To develop material systems, to combat problems of cavitation, flashing etc. in fluid flow elements.
- To provide adequate facilities for testing and to undertake certification of fluid control elements.
- To develop FCRI over a period of time as a centre of research offering facilities for post-graduate/Doctorate studies on fluid dynamics and allied fields through joint programmes with Universities.
- To work for the development of National Standards on flow measurements.

C) Development of Human Resources and Training.

- To develop/train manpower, for fluid products industry.
- Human resources development in the design, manufacture, calibration/testing and evaluation of fluid control elements.
- To train students in the academic Institutions/research through interaction with Universities.

- To train the manpower in the flow products industry from the developing countries especially in the South Asian regions.

D) Information and Documentation:

- To undertake documentation on fluid control/conditioning equipment and related literature including patents.
- To undertake dissemination of technical information.
- To undertake collection of all statistics, technical data and other information relating to the fluid control devices trade or industry and/ or other trades and allied industries.
- To channelize the fruits of the research for commercial exploitation by other industries.
- To organise seminars/conferences/exhibitions and /or to arrange for participation in such activities and similar matters of interest to the industry.
- To establish liaison with similar Research institutes, standards Institutes, Educational Institutions in India and abroad.
- To act as a recommendatory body to identify the technological gaps relating to the technology of fluid control elements and allied equipment.
- To assist Indian Standards Institution/other National bodies appointed by Government of India for certification of flow products.
